

Solid Sands B.V. Amsterdam is expanding Join Us!

Current Opening:
Software Engineer

Who are we?

We are a growing software company with ambition and a worldwide customer base in a variety of rapidly changing industries. The phone in your pocket and the car you are driving relies for some of its software on the quality control provided by our products, SuperTest and SuperGuard. SuperTest is used by our customers to validate their C and C++ compilers. SuperGuard helps programmers to ensure that all of C's library functions can be used safely.

We are looking for:

We are looking for a **Software Engineer** to drive the technical development of our products. This role requires careful, detailed, analysis and design to translate the requirements of language and safety standards into tests. Good understanding of, and experience with C and C++ are a must. It is important that you have a good understanding of the English language. You have full responsibility over your tasks. Your overall big goal is the focus on **quality**.

Requirements:

- Interest in the practice and theory of software engineering
- Interest in the construction (GCC/LLVM) of compilers
- Analysis skills to interpret the language standards
- Analysis skills to solve support issues
- Working knowledge of Linux, shell scripting and Python
- A working permit for the Netherlands

We offer:

- A flexible work environment with the possibility to work hybrid, and a nice office in Amsterdam
- A competitive salary and good secondary benefits
- Flexible working hours
- A pleasant working atmosphere in an international team
- Opportunities for personal growth

Are you the new colleague that we are looking for?
